Hi! I am John Kibocha.

I am a Software Engineer specializing in Software Development, Web Development and System Development. I love creating automated software systems that ease the user's work. I am currently taking my degree in Business Information Technology at Dedan Kimathi University of Technology.

[View Profile](#)

Skills & Experience

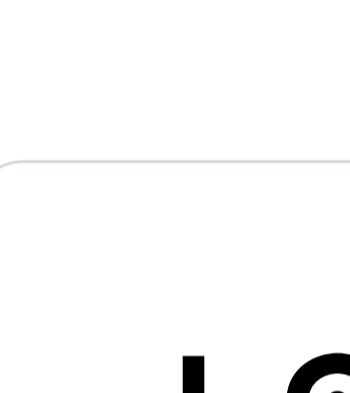

Web Development

I create websites that are clean, simple and that do what they claim to do!

Software Development

I find designing and implementing software systems from scratch refreshing.

System Development

I consider every software I make a system. A living thing that solves problems and can communicate with other software systems.

What I'm good at

Web Design

UI/UX Design

Front-End Development

Backend Development

What I can do

Android Development

iOS Development

Windows Development

macOS Development

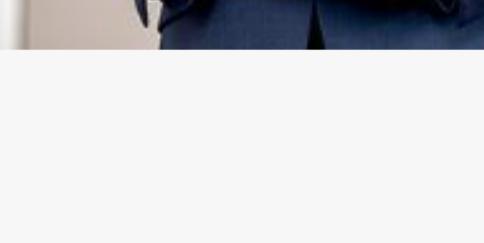

What I know

Linux Server Administration,

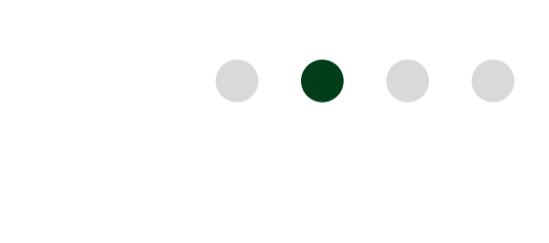

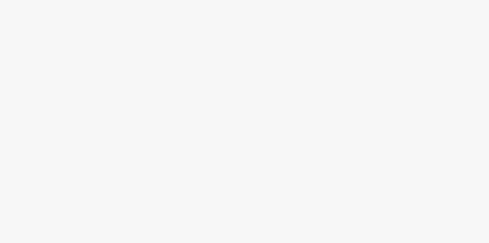

System Analysis & Design,

DevOps,

Testimonials

Kibocha is a competent developer who knows how to turn an idea into a software business solution.

All his systems are professional, powerful and exquisite.

~Peter Ndegwa, CEO Safaricom

Companies I have worked with

It has been my absolute honour to work with these companies.

My time with them has sharpened my skills and

broadened my experience
